

# EARTHEDGE

Specializing in Foam Fabrication

## THERMOBOOST CAMPER'S FOAM

Did you know as much as 93 percent of heat is lost through the floor of a tent through a process called radiant energy? Instead of shivering in your tent on a camping trip, take our Thermoboost Camper's Foam product along with you. Fused aluminum film incorporated in our Thermoboost Camper's Foam stops radiant heat rays from penetrating into the ground. Instead, this unique type of aluminum reflects heat back into your tent to powerfully warm the surface of your bed.

## FEATURES & BENEFITS

- Zero VOCs means low odor and healthy for family, children, pets
- Aluminum laminated to poly substrate
- Larger size and light weight  
76" x 24" x 3/8" - 13.6 OZ
- Made with recycled content
- Aluminum film reflects up to 93% radiant energy for increased warmth
- Black clip strap
- Washable
- Manufactured in North America

*Earth Edge manufactures a variety of products, specializing in foam fabrication.*

Earth Edge is determined to produce environmentally friendly products. As well, we are focused on creating products with recycled content which has kept millions of pounds of scrap materials from being dumped into our landfills.
